VINDOM AREA

Dear Colleague:

We are so proud that you have continued to be a part of the Nurses' Health Study. As we enter our 36th year, hundreds of research papers continue to be published from NHS data. Each one is a tribute to the great value of our work together. As always, these many developments are possible only because of your continued enthusiastic involvement.

We are increasing our efforts to address issues of great importance to older women, such as how to maintain cognitive function and maximize quality of life. As such, your ongoing participation remains critical to help current and future generations of women live healthier lives.

The attached questionnaire continues our biennial follow-up. Your prompt reply is greatly appreciated. As always, your answers will be kept strictly confidential and used for medical statistical purposes only.

If you are unable to complete the questionnaire by yourself, we encourage you to have a family member or friend assist you.

As an original member of the Nurses' Health Study, you are an indispensable colleague in our research. Whether you are retired or working and whether your health has been excellent or if you have been ill, your response is equally important. In short, no matter what your circumstances, we want to hear from you!

It is with our deepest gratitude that we thank you for the ongoing commitment and care that you have generously provided as we continue to learn about women's health.

Best Regards,

Susan Hankinson, RN, Sc.D. Senior Investigator

Zusan Erfanki

Do you have an e-mail address?

If you do, please print your e-mail address in the box so that we may send you occasional updates on the progress of the Nurses' Health Study.

Please print neatly and differentiate numbers and letters (e.g., 1 vs I or i, \emptyset vs O, 5 vs S)

We will <u>not</u> release your e-mail address to anyone!

completed booklet

INSTRUCTIONS

Please use an ordinary pencil to answer all questions. Fill in the appropriate response circles completely. The form is designed to be read by optical-scanning equipment, so it is important that you keep any write-in responses **within** the spaces provided and erase any incorrect marks completely. If you have comments, please write them on a separate piece of paper.

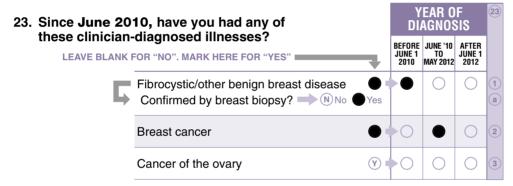

Please fill in the circles completely.

Do not mark this

way: 🗸 🗴 🕒

EXAMPLE: Mark "Yes" bubble <u>and</u> Year of Diagnosis bubble for each illness you have had diagnosed.

- Please tear off the cover letter (to preserve confidentiality) and return the questionnaire in the enclosed postage-paid envelope.
- If your name and address as printed on this questionnaire are no longer correct or are incomplete, or if you are providing your e-mail address, please make any necessary changes on the letter and return it to us.
- Thank you for completing the 2012 Nurses' Health Study Questionnaire.

Federal research regulations require us to include the following information:

There are no direct benefits to you from participating in this study.

The risk of breach of confidentiality associated with participation in this study is very small.

Your choice to participate in this study is completely voluntary and you may decline or withdraw at any time without penalty.

Although complete information is important to the study, you may skip any question you do not wish to answer.

You will not receive monetary compensation for participating.

If you have any questions regarding your rights as a research participant, you are encouraged to call a representative of the Human Subjects Committee at the Brigham and Women's Hospital (617-424-4100).
