Your e-mail:
Please print your e-mail address in the box as this is the most efficient way to contact you about the questionnaire and study updates. Over half of the Nurses’ Health Study II participants complete a web questionnaire – please join us online!

Please print neatly and differentiate numbers and letters (e.g., 1 vs l or i, 0 vs O, 5 vs S)

We will not release your e-mail address to anyone!
INTERNET:
Go to our website at www.NHS2.org and use your ID number (see front of this page) and your birth date to log in and complete the survey online.

PAPER FORM:
Please use an ordinary No. 2 pencil to answer all questions. Fill response circles completely. If you have comments, please write them on a separate piece of paper.

Please remove the cover letter (to preserve confidentiality) and return the questionnaire in the enclosed postage-paid envelope.

Exciting New Research: How the Microbiome Affects Health
In Question 16 of the attached survey we ask you to participate in a ground-breaking new sub-study to examine the role that gut bacteria (aka the microbiome) play in affecting human health. To make this important research possible, we are asking everyone to help us by providing a sample of their saliva and of their stool. As always, we will ensure the privacy of all your results.

Scientists are just beginning to examine how the human microbiome works. Humans and microbes depend on one another – our bodies provide microbes with resources, and the microbes provide functions necessary for our health. It is crucial to learn what types of microbes live in a healthy human, what they are doing, and how they can influence the development of disease. By collecting saliva and stool samples from tens of thousands of women like you, we can begin to describe what makes up a healthy microbiome and also start to define when it may be unhealthy.

The collection process is surprisingly easy, hygienic (and not particularly gross). You will be able to provide a sample at a time that is convenient for you. If you agree, we will send you a consent form and detailed instructions with all the supplies you will need, including a postage-paid shipping box that can be dropped into any mailbox; no special handling required. For more information, visit our microbiome info page at nhs2.org/Micro-N

Measuring Your Waist and Hip
In Question 69, we ask you to measure your waist and hip. If a tape measure is not available, leave the question blank.

For maximum accuracy, please:
• Make measurements while standing
• Avoid measuring over bulky clothing
• Try to record answers to the nearest 1/4 inch (do not estimate)

If a tape measure is not available, please leave blank.

Federal research regulations require us to include the following information:
There are no direct benefits to you from participating in this study.
The risk of breach of confidentiality associated with participation in this study is very small.
Your choice to participate in this study is completely voluntary and you may decline or withdraw at any time without penalty.
You may skip any question you do not wish to answer.
You will not receive monetary compensation for participating.
If you have any questions regarding your rights as a research participant, you are encouraged to call a representative of the Human Subjects Committee at the Brigham and Women’s Hospital (857-282-1900).

Thank you for completing the 2017 Nurses’ Health Study II Questionnaire.
