Dear Colleague:

On behalf of our research group, I again want to express my gratitude for your participation in the Nurses' Health Study II. The enclosed very brief questionnaire continues our every-other-year follow-up.

We hope that you give this questionnaire the same attention and care that you did in completing the earlier forms. The validity of this major research undertaking depends directly on complete and accurate follow-up information for all study members. We know that some participants are no longer in active nursing. However, your continued participation is critical regardless of current employment status. As always, the information you provide is strictly confidential and will be used only for medical statistical purposes.

Thank you again for your invaluable participation in this study. We will be sending you the next edition of our newsletter in June of 1994 to update you on the progress of the study.

Sincerely,

Walter Willett
Walter Willett, M.D.
Professor of Epidemiology and Nutrition

P.S. Your updated questionnaire information is needed to maintain the validity of this study. Your reply within the next two weeks would be greatly appreciated.
INSTRUCTIONS

Please use an ordinary No. 2 pencil to answer all questions. Fill in the appropriate response circles completely, or write the requested information in the boxes provided. Note that some questions ask for information since June 1991, some ask for current status, and some ask about events over longer periods. The form is designed to be read by optical-scanning equipment, so it is important that you make NO STRAY MARKS and keep any write-in responses within the spaces provided. Should you need to change a response, erase the incorrect mark completely. If you have comments, please write them on a separate piece of paper.

EXAMPLE 1: Keep handwriting within the borders of the response box.

EXAMPLE 2: Mark "Yes" bubble and Year of Diagnosis bubble for each illness you have had diagnosed.

10. Since June 1991, have you had any of these physician-diagnosed illnesses? Leave blank for "No". Mark here for "Yes".

- Myocardial infarction (heart attack) • □ □ □
- Angina pectoris □ □ □ □
- Confirmed by angiogram? □ No □ Yes
- Stroke (CVA) or TIA • □ □ □

Thank you for completing the 1993 Nurses’ Health Study II Short Form

Please tear off the cover letter (to preserve confidentiality) and return the questionnaire in the enclosed postage-paid envelope.
