Dear Colleague:

As the Nurses’ Health Study enters its 32nd year, I am more excited than ever about the contributions the study is making to our understanding of the many issues surrounding women’s health. As always, these many developments are possible only because of your continued involvement.

The hundreds of research articles that have been published using Nurses’ Health Study data are a tribute to the great value of your participation. This information helps shape national health guidelines and recommendations. Going forward, we are continuing to focus on how to decrease the risk of cancer, heart disease and other major chronic diseases in women. In addition, we are increasing our efforts to address issues of great importance to older women, such as how to maintain cognitive function and maximize quality of life. As such, your ongoing involvement remains critical to help current and future generations of women live healthier lives.

The attached questionnaire continues our biennial follow-up. As always, your answers will be kept strictly confidential and used for medical statistical purposes only. Your prompt reply is greatly appreciated.

As an original member of the Nurses’ Health Study you are an indispensable colleague in our research. Whether you are retired or still working and whether your health has been excellent or if you have been ill, your response is equally important. In short, no matter what your circumstances, we want to hear from you!

It is with our deepest gratitude that we thank you again for the ongoing commitment and care that you have generously provided as we continue to learn about women’s health.

Best Regards,

Susan Hankinson, RN, Sc.D.
Principal Investigator

Do you have an e-mail address?

If you do, please print your e-mail address in the box so that we may send you occasional updates on the progress of the Nurses’ Health Study.

Please print neatly and differentiate numbers and letters (e.g., 1 vs l or i, ß vs O, 5 vs S)

We will not release your e-mail address to anyone!
INSTRUCTIONS

Please use an ordinary pencil to answer all questions. Fill in the appropriate response circles completely. The form is designed to be read by optical-scanning equipment, so it is important that you keep any write-in responses within the spaces provided and erase any incorrect marks completely. If you have comments, please write them on a separate piece of paper.

Please fill in the circles completely. Do not mark this way: ✗✓○

EXAMPLE: Mark “Yes” bubble and Year of Diagnosis bubble for each illness you have had diagnosed.

18. Since June 2006, have you had any of these clinician-diagnosed illnesses?

• Please tear off the cover letter (to preserve confidentiality) and return the questionnaire in the enclosed postage-paid envelope.

• If your name and address as printed on this questionnaire are no longer correct or are incomplete, or if you are providing your e-mail address, please make any necessary changes on the letter and return it to us.

• Thank you for completing the 2008 Nurses’ Health Study Questionnaire.

Federal research regulations require us to include the following information:
There are no direct benefits to you from participating in this study. The risk of breach of confidentiality associated with participation in this study is very small. Your choice to participate in this study is completely voluntary and you may decline or withdraw at any time without penalty. Although complete information is important to the study, you may skip any question you do not wish to answer. You will not receive monetary compensation for participating. If you have any questions regarding your rights as a research participant, you are encouraged to call a representative of the Human Subjects Committee at the Brigham and Women’s Hospital (617-424-4100).
1. Is this your correct Date of Birth?
   - Yes
   - No ➡️ If No, Please write correct date.
