Dear Colleague:

We are so proud that you have continued to be a part of the Nurses’ Health Study. As we enter our 36th year, hundreds of research papers continue to be published from NHS data. Each one is a tribute to the great value of our work together. As always, these many developments are possible only because of your continued enthusiastic involvement.

We are increasing our efforts to address issues of great importance to older women, such as how to maintain cognitive function and maximize quality of life. As such, your ongoing participation remains critical to help current and future generations of women live healthier lives.

The attached questionnaire continues our biennial follow-up. Your prompt reply is greatly appreciated. As always, your answers will be kept strictly confidential and used for medical statistical purposes only.

If you are unable to complete the questionnaire by yourself, we encourage you to have a family member or friend assist you.

As an original member of the Nurses’ Health Study, you are an indispensable colleague in our research. Whether you are retired or working and whether your health has been excellent or if you have been ill, your response is equally important. In short, no matter what your circumstances, we want to hear from you!

It is with our deepest gratitude that we thank you for the ongoing commitment and care that you have generously provided as we continue to learn about women’s health.

Best Regards,

Susan Hankinson, RN, Sc.D.
Senior Investigator

Do you have an e-mail address?

If you do, please print your e-mail address in the box so that we may send you occasional updates on the progress of the Nurses’ Health Study.

Please print neatly and differentiate numbers and letters (e.g., 1 vs l or i, ѵ vs O, 5 vs S)

We will not release your e-mail address to anyone!
Please use an ordinary pencil to answer all questions. Fill in the appropriate response circles completely. The form is designed to be read by optical-scanning equipment, so it is important that you keep any write-in responses within the spaces provided and erase any incorrect marks completely. If you have comments, please write them on a separate piece of paper.

Please fill in the circles completely. Do not mark this way: ☑ ☐ ☐

EXAMPLE: Mark “Yes” bubble and Year of Diagnosis bubble for each illness you have had diagnosed.

23. Since June 2010, have you had any of these clinician-diagnosed illnesses?
